Initial Design

- Uncertainty in storage tech.
 performance
- Best storage tech. selected
- Approx. sizings of wind, solar, storage capacities selected

Planning, Procurement, R&D

- Demonstrator storage system built for selected technology
- Provides measurement of performance, reducing uncertainty

Final Design

- Exact sizings wind, solar, and storage capacities determined
- Only selected tech. considered
- Reduced uncertainty in performance c.f. initial design

Operation

- System operated to provide industrial load
- Energy traded with grid, including carbon price

Construction

 Total operating cost of system observed
